Austin wants to be sheriff

Look out Tom Tramel, there may be a future sheriff in town.

Five-year-old George Jarvis Austin attends the Kindergarten Center and he wants to be a police officer or a sheriff when he grows up.

Son of Charlotte Hall-Austin, George has begun his school career with a positive attitude. "George is an enthusiastic learner and he is a well-liked and caring person," says one of his teachers.

His interests include T-ball and books, especially the Berenstein Bears series.

According to Principal Earl Watts, "George is a very smart child. He is totally involved in all classroom activities and loves school. With George's ability, I think he can accomplish his goals in life."

What law school in the country is better positioned to deal with the way the profession is going than Georgetown? We have connections to the corporate bar and criminal justice, and we have extensive clinics. We have been oriented to government and politics for decades. Wherever you go, what law school has more beachheads? This is a good place to be.

Working toward, but Not yet hitting target goal of 600 daily units.

Question partly emerged, though I'd thought about previously, while injured (on the job) and with amended rotation. I realized (through observing 'takt time') I could fairly easily avg. 80-100 per hour (approx 35 secs 'takt time' when robot operating at optimum speed = about 102 per hour). That would easily produce over a 1000 units in a 12 hour period

Resource Maximization Strategy designed to help identify and remove bottlenecks. Not gospel, but a good place to start. Iterations, and adjustments would be necessary.

Process Improvement - will involve reviewing current process and rotation as well as information/data regarding various resources regarding machine availability and repair times to consistently hit target output levels.

Quality Improvement - by being more efficient with resources not just speed, but also quality improvements are likely.
